SUMMARY

Informatics Engineering graduate (ITS, 2026) with 2+ years of backend and full-stack experience across organizations, software houses, and a Telkomsel internship. Specialized in building production-grade systems using Golang and TypeScript, with hands-on experience developing AI agents using LangChain, LangGraph, and MCP. Led a backend team of engineers delivering a live tutoring platform, and built real-time systems including a WebRTC-based voice platform as a solo engineer

EXPERIENCE

Schematics ITS – Surabaya, Indonesia

Backend Developer Expert Staff (Mar 2023 - Dec 2023)

- Designed and developed 30+ RESTful APIs to support core features of the platform, handling 50.000++ request with 99% uptime in production
- Delivered 20+ sprint on schedule across 6 month project cycle, collaborating with a cross-functional team of 8 engineers
- Reduced API response time 50% by optimizing database queries and implementing caching

Ini Lho ITS – Surabaya, Indonesia

Backend Developer Expert Staff (Oct 2023 - Feb 2024)

- Developed and deployed 20+ RESTful APIs using TypeScript powering the Ini Lho ITS website, serving 75.000++ visitors during ITS open campus events
- Architected database schemas with 10+ relational tables using Prisma ORM, ensuring efficient data handling across 20+ core modules

Beta U Software House – Surabaya, Indonesia

Backend Developer Lead (Jun 2024 - Jun 2025)

- Led a backend team of 3 engineers building a tutoring and scholarship consultation platform (CV review, essay writing, scholarship guidance) from scratch to production
- Architected and implemented complete backend systems using Golang including JWT authentication, role-based access control, and payment gateway integration (Midtrans/Xendit), deployed to VPS
- Coordinated backend-frontend integration across the team, ensuring seamless delivery of 25+ core features on schedule for a live production platform

PT. Telkomsel – Surabaya, Indonesia

Fullstack Developer Intern (Jun 2025 - Aug 2025)

- Built an internal web platform visualizing coverage and network performance data for Surabaya and Madura region, actively used across Telkomsel's regional network operations team
- Developed full-stack application with React.js frontend and Golang backend, integrating 15+ data sources/APIs to display real-time network metrics
- Engineered an AI Chatbot Agent using LangChain, LangGraph, and MCP, enabling natural language querying of coverage data reducing manual data lookup time

EDUCATION

Institut Teknologi Sepuluh Nopember (2022 - 2026)

Informatics Engineering - 3.79 / 4.00

PROJECTS

CineVibe | Golang, Next.js, WebRTC, WebSocket, PostgreSQL, Redis
May 2026 – Jun 2026

- Built a real-time voice-based social platform for film discussions with WebRTC audio via LiveKit Cloud, supporting room creation, moderated conversations, and role-based access (master/speaker/listener)
- Implemented WebSocket signaling, Google OAuth, Redis session management, and a real-time presence system, deployed to production as a solo engineer

Lensboxd | Python, Flask, Collaborative Filtering ALS, React.js, TypeScript
Dec 2025 – Jan 2026

- Built a movie recommendation system using Collaborative Filtering ALS, with a scraping pipeline (Playwright + BeautifulSoup) pulling data from Letterboxd
- Deployed full-stack: REST API at api.lensboxd.site and React frontend at lensboxd.site, serving personalized recommendations based on user watch history

SKILLS

- **Programming Languages** Golang, Python, PHP, JavaScript, TypeScript, C, C++
- **Frameworks & Libraries** Express js, React js, Laravel, Gin, Flask, Next js
- **Backend Development** RESTful API Design, Database Management (SQL & NoSQL), Authentication & Authorization, Prisma ORM, Security
- **Frontend Development** Responsive Web Design · UI/UX Implementation · State Management
- **AI & Automation** AI Agent Development, LangChain, LangGraph, MCP (Model Context Protocol)
- **DevOps & Cloud** Git, Docker, CI/CD, Google Cloud Platform (GCP), AWS (basics)
