SUMMARY

Software engineer and 2026 Informatics Engineering graduate from ITS with over one year of experience delivering production web platforms, APIs, and payment-enabled services. Shipped 50+ REST endpoints, led a three-engineer backend team, and built full-stack and distributed systems with PHP, TypeScript, Go, Java, React, and Docker.

EXPERIENCE

- PT Telkomsel** | *Full-Stack Developer Intern*

Jul 2025 - Sep 2025

 - Built an internal coverage and network-performance dashboard for Surabaya-Madura operations using React, TypeScript, and Golang Gin, integrating 15+ data sources and APIs.
 - Developed an AI data-query agent with LangChain and MCP, enabling natural-language access to coverage data and reducing manual lookup.
- Beta U Software House** | *Backend Developer Lead*

Jun 2024 - Jun 2025

 - Led three backend engineers from architecture through production launch of a tutoring and scholarship consultation platform.
 - Built an Express JS backend for JWT authentication, RBAC, and Midtrans/Xendit payments; coordinated backend-frontend integration across 25+ features and deployed the platform to a VPS.
- Ini Lho ITS** | *Backend Developer Expert Staff*

Oct 2023 - Feb 2024

 - Developed and deployed 20+ REST endpoints with TypeScript and Express.js for an ITS open-campus site used by 75,000+ visitors.
 - Designed 10+ relational tables to support reliable data flows across 20+ core modules.
- Schematics ITS** | *Backend Developer Expert Staff*

Mar 2023 - Dec 2023

 - Built 30+ REST endpoints with PHP and Laravel for a production platform handling 50,000+ requests with 99% uptime.
 - Reduced API response time by 50% through query optimization and caching; delivered 20+ sprints with an eight-engineer cross-functional team.

PROJECTS

- TicketBus** | Go, gRPC, Kafka, PostgreSQL, Redis, Traefik

Jul 2026 - Aug 2026

 - Architected three Go microservices for authentication, ticketing, and payments, using gRPC for synchronous service calls and Kafka with a transactional outbox for asynchronous events.
 - Implemented PostgreSQL pessimistic locking for race-safe seat reservations, JWT RBAC, refund workflows, and Traefik ForwardAuth; covered the system with 140+ unit and integration tests in GitHub Actions CI.
- CSMessage** | Java, Spring Boot, WebSockets/STOMP, RabbitMQ, PostgreSQL, MongoDB

Jun 2026 - Jul 2026

 - Built a real-time chat backend using STOMP over WebSocket with a RabbitMQ broker relay, JWT-authenticated REST APIs, RBAC, and one-time-use refresh-token rotation.
 - Persisted users with Spring Data JPA and Flyway and message history in MongoDB with cursor pagination; added OpenTelemetry tracing, Testcontainers integration tests, and OpenAPI/AsyncAPI documentation.
- CineVibe** | Go, Gin, WebSockets, LiveKit, PostgreSQL, Redis, Next.js

Jun 2026

 - Built a real-time voice platform for film discussions using Go, Gin, WebSockets, and LiveKit, with moderated master, speaker, and listener roles.
 - Implemented Google OAuth, Redis-backed sessions and presence, PostgreSQL room data, TMDB search, and a Next.js frontend; containerized the full stack with Docker.

EDUCATION

Institut Teknologi Sepuluh Nopember | Informatics Engineering

2022 - 2026

GPA: 3.78/4.00

TECHNICAL SKILLS

Languages: PHP, TypeScript, JavaScript, Go, Java, SQL
Web & Backend: Laravel, Express.js, React, Next.js, Spring Boot, Gin, REST APIs, gRPC, WebSockets/STOMP
Data & Messaging: PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ, JPA/Hibernate, Flyway
Infrastructure & AI: Docker, Traefik, GitHub Actions, Testcontainers, OpenTelemetry, Linux, GCP, AWS, LangChain, LangGraph, MCP
